We were not disappointed in finding bundreds of men there who had not handled a Democratic ticket in years. We expected and did see shoals atelligent citizens who care nothing for ery in their feelings and will the orth Market four years ago, at which Mr. made only half a speech—the other balf being swallowed up in a tempest of popular indignation. To what then shall we attribute this great public change? What element has been thrown into the campaign of 1858, so far as Mr. Douotas is concerned, which has been wanting in all previous contests? Why does he get thousands of listeners in Chicago who have ever before regarded him their bitter personal foe—who, one year sin e, would have deemed it a last-last represent to their families to have taken ing reproach to their families to have taken him by the hand? Is Squatter Sovereignty any less a fraud? Is Dred Scott any less a l bel on the American name ? Has it become any more re-pectable for Mr. Douglas to belle of als opponents? No; none of . The solution is to be found notwithstanding he "cared not lavery were voted down or voted p" in Kassas; the treatment he had received ree Soil position among the people of his y scatiment from his month. They went home disappointed—many of them grieved. Ten times the money and ten times the labor would not bring that crowd together again to The limes the money and tun times the labor which such that the limes of the limes uld not bring that crowd together again to attention cannot be diverted to a minor matter like this. At Epringfield he dismissed it with a seer; elsewhere he has not noticed it at all. We take it that silence before an accusation of such magnitude, so vitally affecting the Senator's reputation, and so nearly concerning the welfare of the country, is the worst possible answer, if it be not indeed a confession of guilt. It was Mr. Benton's be lief that what Calmoun had planned, Mr. Douglas had contracted by execute; that the cool and wary intellect of the South Garoli nian saw the danger to which his favorite form forms and the surface of the contract of the south Garoli nian saw the danger to which his favorite form of the surface at Mr. Douotas, by his audacity, unscrupu-nances and ambition, was well fitted to ap-ty. All the loss and disar-rangements of business incident to the use of depreciated paper, we admit without argu-

Another matter: We have a distinct re-Another matter: We have a distinct re-collection of an attempt that was made only a few months ago to put the business of the city on a specie basis. We remember the meetings of the merchants, the resolves against the banks, bankers' currency, etc., etc., and we remember also that a certain morning paper had the verdancy to believe that this was all serious and that a reform would then be effected. Within a month after that togrand had been permaded to "nitch that journal had been persuaded to "pitch in," the prime movers in the matter, after baving used its columns as they pleased in dvocacy of their cause, backed down from their position, leaving their newspaper friends with the bag to hold. One lesson of that kind is enough.

Systematic Alms-Giving. On our table lie Nos. I and 2 of a modest-little sheet, the publication of which has just been commenced in this city. It is called The Cloud and the Bow, and its object is briefly

and pertinently stated in a display line under the head—" I evoted to the Friendless, the Tempi ed and the Erring." It seems to, as we hope it will, eschew doctrinal theology, and to set forth the duty of liberal alms giving; alms-giving not in a loose, hap-bazard, carcless way, for the purpose of getting rid of the painful importunities and pitiful complaints of those who ask, but systematically and in-telligently, for a purely reformatory purpose; alms-giving for the discouragement of beg-gary, the succor of the friendless, the relief of the tempted, and the reclamation of the

of the tempted, and the reclamation of the erring. The purpose is a noble one, and it will commend itself with great force to the benevolent, who are not unfrequently com-pelled to shut their hearts and purses against all appeals, so frequently is their bounty abused. In addition to the continued enforcement of the duty of giving, The Cloud and the Bow will endeavor to make it plain that the duty of giving to skilled and capable almo success. The articles now being published in the Union against Judge Douglas are written under the special direction of the President, if not with his own hand. The same statements and language are held commonly among the friends of the Administration, and it is generally recognized that spersonal war is indeeded at every hannel, and the Federal Officers go notified that every refusal to enlist will be followed by a removal, as was recently done in Chicaro.

resistance. Experience has demonstrated that there are some cases in which fear is a more pow-erful incentive to action than affection. Judge Douglas adhered tenaciously to the rotten timeers of party organization, preferring their frail sun-port to the stardy hull of principle, which could withstand a dozen such starms and still be ready for as meny more.

These are only a few among the many indica-tions which reach us daily that there is to be war to the knile on the Douglas faction of the Nation-

circulated here, purporting to emanate from Wisconsin, while they have no office in Wiscon-sin, and no offices can be found; not in small circulated bere, purporting to emanate from Wisconsin, while they have no effice in Wisconsin, and no offices can be found; not in small packages, but they are counted by hundreds of thousands, if not millions, and will continue to increase as long as there are stocks to sell and wheat to buy them, and nouse to molest their circulation. It follows as naturally from these conditions as that a leech continues to extract blood till no blood remains, or till it is gorged. Boys are hired to sign the bills as officers, and the bank genius enjoys his leisure a some watering place, draws the interest on the bonds which are the basis of the circulation, while the people are paying for them outright as the inanguration, and paying shares on them ever after, according to the demand that exists for real money. Just at this instant a man at my elbow asks the ominons intercation, "Any uncurrent money to sell?" Should we have another dearth of sold resultances in the natural products of the soit, how often, I ask, would we have this question, either directly at the counters of our bankers? I can guess at it—are you one of the Editors that knows?

2d. The evil affects directly those that are least able to bear it, and indirectly all classes are the people genteelly, not under tool or flaw merely, but under the broost eagle wings of the law, none darring to molest or make him afraid. True, there are points of sittack where the

missrable pictures of boys' making, under a rule of law made by men.

price of it the difference between the currency and coin; for the merchant has to pay for his goods in coin or its representatives, which we all know our precious "history" eitherency never yet portrayed, except now and thating green issue of homesty, which, when it had its green issue of homesty, which, when it had its green as created out," shalled off that morfel" boil as soon as circumstaneas would permit, and at once put itself under the care of currency doctors more retract in the games of the law for remusitation under different forms. Of this class, the shadows only are left—names—but no circulation. It affects, indirectly, the wholesale merchants of this city for the same reason. The country dealer comes in here and finds that the jobber has added to the cost of his goods, not only the cost of transportation, but the difference between our standard of selling and the standard in New York, which, of course, is gold. If he has been in the habit of buying in New York, be demure, and says he would rather take the risk on exchange and go to New York for his supplies, thus giving to New York the precedence were our own city as a distributing point, and tending to make us a restall, one-horse town, in a far as this branch of buttless is concerned.

and for the same reason affects the country at large, transferring the fruits of mercantile toil, which should remain here to strengthen her bul-warks, to the coffers of the New York merchant. The annual profits on inerchandise that will be through this influence transferred thus from our midst to the s-aboard under the increasing evils of adding to the supply of mortrages among us, cut up infinitesimally to represent money, as the fruits of letting it alone, will in a few years be counted by millions. Can we afford thus to part with our patrimony for the stale satisfaction of sustaining such a home currency for the sake of peace, and the tears of a war upon it?

Are we prepared to murder general interest, and sacrifice a great principle with them, merely because some lazy men, wish to draw the interest upon 44,000,000 of stocks, and make the people

bankers, but the experience and study of the past six menths in the working of our banking institutions have broken the spell. It is not gold in his coffers, but breas in his face, that make a soccessful banker in the West; and we might add, a people who appreciate the latter qualification in preference to the former, are adjuncts in carrying on his bosiness, and no doubt are duly appreciated by him. Ought he not to be grateful in looking at the insocent faces of such a people?

CHANGE OF THE PENNSTIVANIC RAILBOAD.
The tunnels on the Lancaster and Harrisourg Railroad having been widened, on Monday next the Pennsylvania Railroad Company will commence raining their cars through from this city to Pittaburg, thus avoiding the necessity of changing cars at Harrisburg. By this arrangement the large size cars, which have heretofore been used only between Harrisburg and Pittaburg, will run over the whole road. They are about one mud a half feet wider than the ordinary car, are provided with high backs and recining geals, and are well-adapted for keeping purposes. The cinductors will, under the new arrangement, Film the whole trip and then lay over for one day. Philadelphia Press, 17th.

Here are \$.000,000 of us living in London in a manner which is every day becoming more and more unbearable. Foreigners have always been disappointed in London, but now-adays they are astonished, not to say disgusted. No doubt some improvements have been made; new districts have arisen, better built and better drained than the old, but they are at the extremities, and London proyer is kecoming foul and dingy and dilapided and stinking eyery day. The Parsian, but the Viennese, the New Yorker is surprised at the Wiennese, the New Yorker is surprised at the Wiennese of the buose, the closessus and smallness of the shops, and the general sloveniness and wan of care which meet the eye on every side. The Londoner seems to have no idea of pulling down a house. Whether from want of enterprise or from a bad system of tenure, vast districts in the most advantageous situations are covered with worthiss houses, which are allowed to stand and become worse and worse yearly, until they tumble down or otherwise ceases to ghe platitable."

Curnors Pursonances in Scort. Purson Purson of the house, like a thick cream. The supharous substance was skimmed off and dried on a piece of shand. When dry it was a fine powder, and when thrown into the Erre guided exactly like gunpowder, making a slight farting noise. Unfortunately none was preserved beyond what was experimented on in this way. A boat at Craighton was powdered all over with the same substance; and a country man lying on the height near Kilmuir says that near his bouse, in the space of what an ordinary washing-tub would cover, he could lift the powder with a spoon. r the extension of the trade of Indianapolis, pulsivile, and Cincinanati, and give to the recommendation of the Commandation o spoon.—Inverness Couries.

EARLY RHOSE ISLAND SWEET CORK.—We are indubted to our worthy fellow-citizen, Mr. Claff im of middle Allos, for a nice "batch" of this early sweet corn to day. It is the first we have seen, and the ears and kernels are well filled out. Mr. Claffin had it on his table as early as the 4th of July. He informs us that he expects to save a quantity of it for seed, to secommodate his neighbors and friends. That is an excellent idea. Save and distribute good seed.—Allon Dem. 1944.

Anorsza Hornery.—About four and a half o'clock this moraing, Mr. Hugh Stuart's residence, near the new Methodist church, was entered, and some \$500 taken from a stand near the bed in the room where the occupants, Mr. and Mrs. Sjewart, were sleeping. Mr. Stewart was awakened as the robber was heaving the room, and promptly fired on him, but he escaped.—16.

were being removed from the office of the Quarter master-General of the Mormon Army, and tha workmen were tearing off the shutters and nail ling boards over the windows. In many of the vacated buildings I see piles of combustibles ready for firing.

You are aware of the unsuccessful attempt of D. W. Thorpe, an agent of Col. Kinney, to communicate with Brigham Young from the East Law Winter. The Colonel was more forfunate it agents which he dispatched from the California side. Three gentlemen, aamed Clarkson, Brockte and Harvin, arrived from Proro last week, where they had been visiting Brigham. They had proposed to sell bin, on behalf of Col. Kinney, 5, 00,000 acres of land in the Mosquito country, 3, 00,000 acres of land in the Mosquito country, at ten cents per sere. But Brigham replied that this country suits him well enough, and that be intended to make a stand here.

There is little money current here except the Mormon gold soin, and the one dollars shipplasters of the Deserte Currency Association, which are printed on tissue paper. These bills promise to pay "ope dollar in live stock upon the presentation of one handred dollars." I have not seen a piece of silver since I have been in the city. The Mormon guard which remains in the city has its regular roll calls at sunuse and sunset, at which it appears noder arms. Whether these performances are authorized by Gov. Curmning I do not know, but it would be more indicative of "bitmony" if the guard would confine itself to the datty of police silvent appring to milliary display. DR. E. "The Misery or the Third,"—A Petersburg er, writing from the Hrgein, at Old Point Com fort, to the Intelligencer, says: "The bathing here is peculiar. A stockade is built out in the water, into which you enter and enjoy yoursel as well as you can, considering another stock ade is erected for the ladies. This is the miser of the thing. A few paces off, you hear the most delightful shricks and screams, and the most musical laughter. You know that fun is going on. But where you are, there is naugh save a melancholy "slooning around" yo bilious and hideous males. The contrast between the two stockades—the fun, the frolic, and the fe males in the one, and the dull masculine splashing in the other—is horrid, horrid." This is broken completele off in many places, and throughout the entire line to Chapultepec the arrers are broken horizontally, sho sing that they were subjected to a severe oscillating motion. The water was precipitated from the aqueducis throughout the entire line.

In many parts of the city wide cracks were made in the earth. In some places it has assumed an irregularity of several inches on the sides of those cracks by sinking or elevating. We learn that in one private house one-half of the floor of a room has sunk down several inches below the other half, making a complete step.

The National Palace suffered considerably. In many parts of the building damage has been done, especially in the treasury department.

The old theatre, in the Calle Colisso, was shattered in almost every part. Stones are too out and in for several inches.

The convents of San Fernando, San Francisco, Profesa, San Geronimo, San Juan and the Sagrario, have been seriously damaged.

The losses sustained in the city are estimated at \$5,000,000 to \$6,000.000.

The number of bodies recovered from rains in different quarters of the city is about twenty. It is feared that all of the dead have not yet been excavated.

The shock appears to have been equally heavy the citizens excitated about the valler. FIELD, BENEDICT & CO., Hem, Stitch, Tuck and Gather, Deposits resolved and instruct paid on Deposits resolved and instruct paid on Gold and Elves partial providers.

The Government has issued an order to all the Governors of departments and military chiefs, to stoid, in the event of being compalled to exact loans, the compulsory payment by foreigners of such imposts.

The condition of the compulsory payment by foreigners of such imposts.

The condition of the compulsory payment by worse, if, any perceptible change can be observed. The Government in destitute of money, the clergy have agreed to give \$3,000,000 more, but how the money is to be raised doth not yet appear. A portion of that sum may be raised. Parties remain in the field about the same as the date of my last. Candalajars and Quantipato have both been occupied by federal troops in the last week, but have been delivered again to the Government. In the inter place, the Government lost near \$300 men, the lown was sacked, and Pueblita, the federal leader, managed to carry of \$500,000 in money. In Guadajars the fighting was severe, but as yet the articulars have not yet reashed this place.

While the Government is dragging its miserable cristence through a few months, the country is being piliaged in every direction by both parties. The armies in the field number, all put together, about \$9,500 men. SPRING STYLES FOR 1858 NOW READY. ade to purchasers for Califor on abort time.

Balliors Press and Tribuse:

As latter-writing is fashionable, postage champ, and rainy days plenty, I will try to give you a brise account of the crops in Woodford and Marshall Counties. There are some few lossitities in those counties where the lands are very rolling, or where the rains have not been so abundant, that may have a fair yield of wheat; but those spots are like angel's visits, they are few and far between. There was not as average amount of winter wheat sown last fall, nwing to the frequent failures of late years, and the scarcity of seed. The crop is badly hart with the rust; many fields will not pay the

eveds, unless you never the control litinois. The season for working corn is about past, and there has been so much rain that it is impossible to more it in many places. Consequently, the corn wry must be very short. I have been farming twelve years in Woodford County, but we have the poorest prespect for crops this year that I ever asw.
